Bricks are designed to last

Versatility in design, durability that lasts a lifetime and the highest thermal comfort, with almost no maintenance. Clay bricks tick all the boxes for homes and projects with value and sustainability in mind.

Affordable Value

–
Your building material is the most important decision you will make when building your new home, so you want to be confident you are making the right choice.

Low Maintenance

–
Bricks require very little maintenance, meaning you have one less thing to worry about. Bricks don't fade, rot, rust or decay, meaning they remain completely weatherproof, durable and attractive forever.

Strength and Safety

–
Bricks are fire resistant – when you build with brick, you are protecting your investment and your loved ones.

Energy Efficient

–
A home built with brick helps you do your bit for a more sustainable planet, while reducing your bills by up to 40%.

Naturally Sustainable

–
If you want a sustainable home, bricks are a great choice. Building a sustainable home has never been more important. There are three ways that building with brick will make your home more sustainable both now and into the future:

1. Reduced household emissions.
2. Clay bricks are made from organic minerals found in naturally abundant sources of clay.
3. Brickworks clay bricks come with a 100 Year Warranty.

iVisualise

Our premier, industry-leading home visualisation tool will help you design your dream home. All with the touch of a button.
Available now at **brickworks.co.nz**

Step 1

Visit **brickworks.co.nz** and tap on the iVisualise link in the main nav.

Step 2

Once the page loads scroll down to select a house or interior that closely matches your own project.

Step 3

Click on the house you'd like to customise. This will open the visualiser ready to edit.

Step 4

Tap on the walls of bricks or other house features to open the editing tool and start selecting your options.

Step 5

Close the editing tool to view how your designs are coming together. All features of a house are changeable.

Step 6

When done, tap on the Log In button in the top right corner to create an account and save all your house creations for future reference.

Origin Range

—

The bricks of the Origin range are fresh and modern. Whether you want a clean and minimalist look or one with character, these colours and textures combine beautifully with other materials like timber, stone, steel and glass to make your home a statement of your individual style.

Whitehaven 230 × 76 × 70mm

San Selmo Range

S.ANSELMO
vivere la differenza

Italy - inspired, rustic, charming and richly textured, San Selmo brings with it a strong European heritage.

Kilnfired in Italy, these elegant clay bricks boast a tactile surface inspired by recycled bricks, lending a distinctive rustic finish. With a tonal palette ranging from pale hues, deep colours of the earth to steely blue-greys, they're perfect for both modern and traditional homes, adding genuine warmth to any project while offering versatility for contemporary architectural endeavours.

How to Select Your Bricks

Designing your new home is an exciting experience as you discover the multitude of design ideas at your disposal. The Brickworks team will help to make the experience as satisfying as possible. We recommend you use at least three of these selection tools available to you:

Brochures & Websites

A great way to narrow down your selection but remember colours and textures are only indicative.

Display Material

Some builders have sample boards in their offices, these are a good way to view the bricks.

Design Centres

Visit the Brickworks Design Centres to view display walls. We also have tools such as window joinery and roof colour swatches to help with your selection.

Sample Packs

You can request a sample from us which we can send to you. This will be from a recent or current batch and will give a good indication of brick colour. Our sample will have a batch number so you know what your house will look like (remember bricks vary from batch to batch). Please ensure the batch number is quoted at time of ordering. If we have

since run out, then we will send you a new sample.

Recently Constructed Houses

We can provide you a list of recently constructed houses that you can view from the street.

Considering a blended brick?

Be aware we endeavour to always show a light and dark brick however the final blend will not be in equal proportions and there will be a range of colours between the light and dark. Consider your mortar colour and joint finish as this can have a dramatic affect on your homes overall appearance.

Important

It is important to remember that any issues regarding the quality, texture or colour of the bricks must be addressed with the brick supplier prior to the laying of the bricks. A brick laid is a brick accepted. Thoroughly check all pallets upon delivery.

Bricklaying

For optimal Brick Veneer design, consult a bricklayer early in the planning process to leverage their expertise in both design and materials. For guidance on brick installation and maintenance, refer to the [Master Brick and Blocklayers Brick Veneer Best Practice Guide](#).

Scan the QR Code to access the best practice guide on your phone.

Mortar Colour

Natural

Off White

Charcoal

Black

When it comes to mortar (what binds the bricks together) you will need to consider the colour and finish, as both will have a striking impact on the look of your bricks. Mortar constitutes approximately 15% of the brick facade colour. An off-white mortar between darker coloured bricks will add contrast and highlight the shape of each brick. Whereas matching mortar colour to the brick will soften the brickwork. Please confirm with your builder or brick layer what their mortar colouring offering is before you make your final decision.

Mortar Finishes

Raked

Flush

Flush

Weathered

When it comes to mortar finishes, it's all about the lighting. There are four common finishes; raked, rolled, flush and weathered. A raked finish is recessed, creating deep shadows in the horizontal mortar joint, bringing out the lines of the brick work. A rolled finish also creates shadow lines, but they are subtler. A flush finish doesn't allow for any shadows in the joint, giving the wall a flatter, more unified look. A weathered joint gives a neat, well ordered look.

Bond Pattern

Stretcher bond

Stack bond

Flemish bond

A bond is the pattern in which bricks are laid. The most common bond is Stretcher Bond which consists of courses of full bricks where every course is offset half a brick from the course below. Stacked and Flemish are also a popular alternative look.
